## EXPERIENCE

### TATA CONSULTANCY SERVICES | ASSISTANT SYSTEMS ENGINEER

2020 – 2022 | Pune, Maharashtra

- Member of Automation-Centre of Excellence(CoE) team
- Client: General Electric (Gas Power)
- Developed and delivered multiple Ansible playbooks to deploy and configure compliance software and complex use cases
- Used AWS (S3, SNS, CloudWatch, IAM) for project deliverables and deployed the code to Production after unit-testing
- Assisted in Installation and Configuration of Ansible Tower for a HA infrastructure, setting up the CI/CD pipeline and triaging to provide solution for the failed hosts.
- Proactively engaged with the client team members to facilitate the documentation of the entire technical process
- Client: Deutsche Bank
- Developed and delivered Ansible playbooks to configure the compliance software

### BITLANCE TECHHUB | ANDROID DEVELOPER INTERN

2019 – 2020 | Amravati, Maharashtra

- Collaborated with other team members to develop an android app for demo project

## PROJECTS

### HOSPITAL MANAGEMENT SYSTEM

- A web based HMS project which maintains the data and calculates the final bill including medical expenses of patients currently admitted in a hospital.
- Front-end: HTML5, CSS3 Back-end: JAVASERVLET, MYSQL

### WEB PROJECT USING REACT.JS AND SPRING BOOT

- Developed a minor project using Spring Boot and React.js. Created and consumed REST API to fetch and update the data in MySQL Database. Created the front-end in React.js and made successful connection to the back-end.

### WEATHER APP USING JAVASCRIPT

- HTML, CSS and JavaScript based Weather application which displayed the weather details according to the search parameter. Used Rapid API Hub to consume the community provided Weather API.
